**DETAILED ACTION**

1. The preliminary amendment filed March 24, 2003 has been received and entered.
2. Claims 1-21 have been cancelled.
3. Claims 22-63 have been added.
4. This restriction requirement is in place of the restriction requirement mailed March 25, 2003.

***Election/Restrictions***

5. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22-34, drawn to a soy protein product, classified in class 426, subclass 573.
  - II. Claims 35-63, drawn to a method of making a protein product, classified in class 426, subclass 507.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made in a different manner, such as creating the product by extracting with different pH values from those claimed.

Art Unit: 1654

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
